

TekniaGreek Accent Mapping (Macintosh)

Hold the Option (ø) key down while pressing the second character. In the case of three characters (e.g., ø e a), hold down the Option while pressing the second character (ø e), release both keys, and press the third key (a).

For you techies, the numbers are the character's decimal value. TekniaGreek is encoded on the Macintosh as Macintosh Roman with a total of 256 characters (0-250).

<i>accent</i>	<i>regular</i>		<i>non-backing</i>		<i>thin (ι, ε)</i>		<i>thick (ω)</i>
´	j 106	=	61	ø j	198	ø h	250
